SUMMARY

Final-year Bachelor of Information Management student with an IT-focused academic background and hands-on experience in security auditing, cloud security assessment, and technical projects. Familiar with information security principles, network security concepts, access control, and security monitoring fundamentals. Experienced in documenting technical requirements, assessing security controls, and working collaboratively on software and security projects. Interested in developing practical skills in computer networking, IT infrastructure, network troubleshooting, and technical support.

SKILLS & INTERESTS

Networking & IT Fundamentals: TCP/IP Fundamentals, IP Addressing, Subnetting Fundamentals, Network Security Concepts, Basic Network Troubleshooting, LAN/WAN Concepts

Security: Access Control & User Provisioning, 2FA/MFA, Security Monitoring Fundamentals, Incident Response Lifecycle, Vulnerability Identification, Information Security Principles

Security & Compliance: ISO/IEC 27001 Annex A, NIST Risk Management Framework, Information Systems Auditing, Compliance Assessment, Security Documentation

Programming & Tools: Python (Basic), JavaScript, C · React, Node.js, PostgreSQL, Git & GitHub

CERTIFICATIONS

- Google Cybersecurity Professional Certificate

EDUCATION

Tribhuvan University (St Xavier's College)

Kathmandu, Nepal

Bachelor of Information Management

2021- present

- A comprehensive course (126 credits) affiliated to Tribhuvan University that includes subject matters related to Information Technology and Business Management. The course intermingles management themes with IT and explores the scope of networking, cybersecurity, AI, programming and so on.

Higher Secondary Education Board (Radiant Secondary School)

Kanchanpur, Nepal

Higher Secondary Education (Science faculty)

2018 - 2020

- Pursued my higher secondary education within the Science faculty. Took classes for Physics, Chemistry, Mathematics, and Computer Science.

EXPERIENCE

GRC Information Security Visualization Intern

Kathmandu, Nepal

Himalayan Integrated Cloud Technologies

December 2025 - March 2026

- Contributed to development of a security auditing platform built on ISO/IEC 27001 Annex A control domains, supporting organizational compliance assessments.
- Built a customizable audit checklist feature with configurable domains, controls, scoring, and maturity ratings.
- Integrated the Claude API to automate generation of structured audit reports from findings and scores.
- Gained working knowledge of ISO/IEC 27001 Annex A controls through hands-on translation of framework requirements into structured audit criteria.

PROJECTS

ISMS Audit Toolkit

- Developed a web-based information security audit platform that enables organizations to conduct structured ISO/IEC 27001 Annex A compliance assessments across multiple control domains.
- Track maturity levels for each security control, upload supporting evidence, and assign remediation action items to team members.

- Built using React, Typescript, Node.js, and PostgreSQL.
- GitHub: https://github.com/sumijoshi60/isms_audit_toolkit.git

Cloud Security Audit Framework

- Developed a cloud security assessment platform that evaluates cloud infrastructure against industry standards across six security domains (IAM, Network Security, Data Protection, Logging & Monitoring, Configuration Management, and Incident Response).
- Built using React, React Router, and Vite.
- Link: <https://cloud-audit-framework.netlify.app/>

BIM Summer Project

- Developed my summer project titled “GiveHeartedly: A Charity Fundraising Platform”. GiveHeartedly is a fundraising website that allows users to create fundraising and donate to meaningful campaigns.
- The project was built using the MERN stack.
- GitHub: https://github.com/sumijoshi60/GiveHeartedly_Project

PARTICIPATIONS

SXC Sandbox 2.0 — 48-Hour Hackathon (Second Runner-Up)

Kathmandu, Nepal

St. Xavier's College

March 2025

Second Runner-up

- Built “BikriBagaicha”, a React Native app connecting farmers directly with vendors.
- Collaborated in an agile team environment under tight deadlines.
- GitHub: <https://github.com/sumijoshi60/Bikri-Bagaicha.git>
